

# Conditions of Slaughter

## TRANSPORTATION OF STOCK

- Stock must be in a fit state to travel (Reference MPI Fit for Transport App).
- Stock must be emptied out for a minimum of four hours prior to trucking or, depending on the season and feed conditions, the same time as required for penning up for shearing.

## DELIVERY OF STOCK

- All stock being sent for slaughter must be accompanied by a Te Kuiti Meat Processors Animal Status Declaration (ASD) form correctly filled out and signed by the owner or manager. Please ensure that the yellow backing card in the ASD book is also completed. An ASD must be provided for each line presented for slaughter.
- Additional stock arriving over and above the number confirmed the week prior to the week of supply must have plant approval. Excess numbers that cannot be accommodated may be returned to the supplier at their own cost.
- Trucking delivery times and supply tallies must be adhered to. If a problem does occur, please advise the plant immediately so as to minimise processing disruptions.
- No merinos will be accepted for slaughter without prior plant approval.
- Horned animals will be accepted for slaughter only by prior agreement.
- Johnes-treated mutton must be advised prior to being sent to plant.

## INFORMATION

- The information you have supplied will be seen by others in an abridged form used in the scheduling and planning of the daily kill requirements of the TKMP Group.

We have made it easier for you to update your details and to tell us who you want us to communicate with, on your behalf, on the Notebook My Account page.

 means that the field is editable. Any changes you make on this page will come through to us and we'll ensure that our systems records are accurate.
